

High Temperature Neutral Silicone SN-350

High quality silicone developed for applications subject to high temperatures.

Features:

- Resistant to temperatures up to 350°C
- Flexible and long lasting seal after curing
- Great power of adhesion
- Fast curing
- Non-corrosive
- Water and UV resistant
- Odorless
- Resistant to weather conditions

Applications:

- Sealing of surfaces subject to high temperatures:
 - Ovens
 - Fireplaces
 - Chimneys
- Exhaust gaskets:
 - Hot fluids and/or thermostats
 - Heat pipes
 - Car parts
- Good adhesion:
 - Lacquered and anodised aluminum
 - Stainless steel and other metals
 - Ceramics
 - Glass
 - PVC
