

Rust Converter

Product for the treatment of partially or completely rusted surfaces. The product converts the iron oxides (rust) turning them into an inert passivated metallic compound which forms a good anchoring base for painting or for protection.

Features:

- Direct application on rust
- Prevents against future rust
- Extensive formulation
- Low toxicity
- Paintable surface

Applications:

- Applicable in:
 - Industrial machines
 - Agricultural machinery
 - Surface treatment
 - Construction
 - Repair of ships
