

Hydrotech - Facades and Roofs

It is a liquid water repellent that forms a waterproof barrier. It has been specially developed for application in porous materials such as brick, concrete, fibrocement or natural stones non-calcareous.

Features:

- Colorless
- Invisible
- Paintable
- Resistant to surface abrasion
- Resistant to extreme temperatures
- Microporous
- Allow surfaces to breathe
- Absorbed by the materials
- Good penetration acting in depth
- Effective and lasting protection
- Does not change the natural appearance of materials
- Reduces the appearance of efflorescence
- Protects against dirt and fungi and moss growth

Applications:

- Ideal for applying on roofs, facades and walls
- Applicable in:
 - Brick
 - Concrete
 - Concrete sanded
 - Fibrocement
 - Mineral plasters
 - Natural or artificial stone non-calcareous

Available in colors:

- Colorless
